STYLISH.

H & H
BATH AND SAFETY

Dependable design created to provide optimal comfort to those who need it most

Durability and elegance using #304 solid stainless steel material in a variety of finish options for the best of both form and function

One-piece welded construction offers secure weight-bearing support

YOUR PEACE OF MIND. OUR BEAUTIFULLY CRAFTED DESIGNS.

H & H Bath and Safety promises our seasoned approach to innovation, craftsmanship and service in all of our work. From initial concept and prototype design through tooling and production, we treat each product as if intended for our own family's use. We embrace an Eco-friendly philosophy, using #304 stainless steel material, 100% recyclable in finished form.

Our in-depth knowledge of manufacturing and craftsmanship assures that the Designer series meets the highest standards in its class. Style, comfort and safety combine in each of these bold, innovative designs. The Designer series integrates our decades of experience in providing stable and secure structural options in a bathroom environment — proven to create confidence, self-reliance — and peace of mind — for the elderly and physically impaired. Underlying the fluid lines and elegant simplicity is our commitment to functional support, durability and intelligent style — all in service to health and quality of life.

Sleek design with minimal profile and fold-up function for space savings
